**Standard floor pads**

# Caring for your floor

For machines operating up to 600rpm. 85mm push out centre hole prevents the floor pad from overheating. Pads hug uneven floors and can be used on both sides with no loss of efficiency. To extend the life of the pads, brush the pad surface while rinsing with clean water by using the centre push-out piece, and hang to dry.

## Light cleaning

Light cleaning and spray burnishing. Use wet.

## Scrubbing

Hard aggressive scrubbing wet or dry, with strippers. Prepares the floor for new emulsion floor polishes.

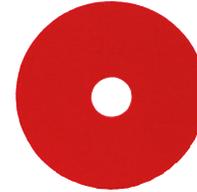

## Intermediate cleaning

For the removal of surface layers of wax and to prepare the floor for the next process. Use wet.

## Polishing

For light cleaning and maintaining all types of floors. Use dry.

## Polishing spray

For frequent use on relatively clean floors and spray burnishing. It also cleans and polishes dry.

## Finishing & polishing

Suitable for finishing and polishing floors. Use dry.

## Stripping & cleaning

For wet scrubbing strong layers of emulsion floor polishes. Removes the old finish and eliminates concrete burns.
